RV A/Cs, Roof Mount A/Cs, Cassette A/Cs, Central A/Cs and similar ARE NOT Compatible

****IMPORTANT NOTES - PLEASE READ!****

> All window A/C units MUST have digital display & automatic restart. Analog A/C's (with knobs instead of digital display &buttons) will not work.

> A/C Secondary Sensor Guide & **Mini-Split CoolBot Installation Guide** available in our Support Library at https://www.storeitcold.com/support-library/

> Please **DO NOT purchase REFURBISHED A/Cs**. Buy only new A/Cs and ensure they are from a reputable seller.

> For portable A/Cs, see WHYNTER brand on page 3.

> Most compatible window A/Cs can be found at these sources:

build.com homedepot.com lowes.com
bestbuy.com amazon.com walmart.com

COMPATIBLE WINDOW A/C's

IF YOUR A/C UNIT IS NOT LISTED AS COMPATIBLE, COOLBOT CANNOT GUARANTEE ITS COMPATIBILITY

Please reach out to us at support@storeitcold.com or (888) 871-5723 if you are considering using an unlisted brand. Although we can't guarantee compatibility, we're happy to support you if you opt to test a new model.

BRAND	NOTES	SECONDARY SENSOR(S)	MINIMUM-ON CYCLE TIME
		Some A/C's have secondary sensors. **This is OK** as long as the A/C is of these compatible brands! Just one extra step is involved during CoolBot installation to relocate that secondary sensor. Please see our Secondary Sensor Guide and video on Locating the Secondary Sensor for simple setup instructions.	A/C's with a minimum compressor-on time may cause slight overcooling, especially if oversized for the cooler space. This is OK for most applications! If using a brand with this feature, please use our A/C Size Calculator or contact us for help sizing the A/C to minimize overcooling or and prevent icing issues, especially if your application is floral or another delicate product that could be affected by momentary temperature dips.
ARCTIC KING	Any digital display model	Most models 12K or larger have secondary sensors	HAS MINIMUM-ON CYCLE TIME
DANBY	Any digital display model **Avoid models pre-2011**	Most models 12K or larger have secondary sensors. Some 8K and 10K models also have secondary sensors	HAS MINIMUM-ON CYCLE TIME
FRIEDRICH	**Chill Premier series** (e.g. CCV12A10A, CCW18B30B, CCW24B30B)	Have secondary sensors. Inverter & non-inverter "Chill Premier" series both work well.	DOES NOT HAVE MINIMUM-ON CYCLE TIME
FRIGIDAIRE	Any digital display model **Avoid models pre-2015**	Most models 15K or larger have secondary sensors	HAS MINIMUM-ON CYCLE TIME
GE - GENERAL ELECTRIC	Any digital display model **Avoid models pre-2015** **Avoid AHC models**	Most models 15K or larger have secondary sensors	DOES NOT HAVE MINIMUM-ON CYCLE TIME
HAIER	Any digital display model **Avoid HWE Models**	Do not have secondary sensors	DOES NOT HAVE MINIMUM-ON CYCLE TIME
LG	Any digital display model **Avoid LW6017R model**	Dual-inverter models have secondary sensors Other models do not have secondary sensors	DOES NOT HAVE MINIMUM-ON CYCLE TIME
SAMSUNG	Any digital display model	Most models 12K or larger have secondary sensors	HAS MINIMUM-ON CYCLE TIME
SEASONS	Any digital display model	Models 18K and larger have secondary sensors	HAS MINIMUM-ON CYCLE TIME

COMPATIBLE DUCTLESS MINI-SPLITS

IF YOUR A/C UNIT IS NOT LISTED AS COMPATIBLE, COOLBOT CANNOT GUARANTEE ITS COMPATIBILITY

BRAND	NOTES
	-When choosing a mini-split, select "bare bones", ductless (wall-mounted) models with the basic onboard (air handler) room thermistor, no remote sensing or smart wall thermostat consoles. The CoolBot will be installed to the air handler's primary room sensor. -All mini-splits will have at least one secondary sensor. This is ok! Just be sure to choose a compatible brand. Please see our Mini-Split CoolBot Installation Guide for more information and installation pictures.
MITSUBISHI	Any ductless model.
MR COOL	DIY (pre-charged) ductless models work well with the CoolBot (EZ Pro and DIY series)
FUJITSU	Any ductless model.
LG	Any ductless model except HSV models. Avoid models with "HSV" in the model number
GOODMAN	The Canadian 24K BTU ductless model works well. No data available for other models. Avoid US models.
SAMSUNG	Ductless models, for 45°F+ applications ONLY.
